## The Force of Friction (Sample Assessment)

Posted by [sat](#) on Sat, 2016-04-09 19:26

This sample assessment investigates friction in a rolling toy car.

The resource was developed by QCAA - students conduct an investigation into the effect of friction on the distance a toy car travels after rolling down a slope.

The resource includes detailed background information about the science concepts, student worksheet, continua model of task-specific standards for A-E assessment, suggestions for student feedback and links to the Australian Curriculum.

New Australian Curriculum 9 Codes: AC9S4U03 (Year 4)
