Investigating Contact and Non-Contact Forces

Posted by [sat](#) on Sun, 2014-06-08 20:00

These downloadable resources explore contact and non-contact forces.

The resources are MS Word documents that detail investigations to help younger students explore non-contact forces (e.g., magnetism and gravity) and contact forces (e.g., friction and air resistance).

These forces are investigated through three activities: balloon rockets, magnet strength, and a rolling car.

The documents also include support materials and the appropriate links to the Australian Curriculum: Science.

New Australian Curriculum 9 Codes: AC9S4U03 (Year 4)
