Testing scientific claims about physical fitness

Posted by [sat](#) on Wed, 2014-06-18 21:14

This online resource allows students to investigate scientific claims related to physical fitness.

The resource has student worksheets and teacher resources available for an investigation into examining scientific claims related to physical fitness.

Students collect first-hand data and go through a process of peer review to examine a claim relating to the data.

Second-hand data is then offered to help in the examination of new claims. Students are led through the process of analysing the data.

Australian Curriculum v9 Codes: AC9S8U02 (Year 8), AC9S9U01 (Year 9)
