Classifying Solids, Liquids and Gases - Misconceptions

Posted by [Anonymous](#) on Sat, 2014-06-21 23:11

This online resource helps identify common misconceptions about the states of matter.

The resource provides background information about the states of matter that can help teachers identify and explore some of the common student alternative conceptions.

It also gives the proper scientific view, critical teaching ideas and teaching activities.

Australian Curriculum v9 Codes: AC9S5U04 (Year 5)
