Connect the Spheres: Earth Systems Interactions

Posted by [sat](#) on Tue, 2014-07-01 09:07

This online resource investigates the Earth's spheres, with emphasis on water.

The site gives students an understanding of the Earth's four environmental spheres (ie., the biosphere, hydrosphere, geosphere and atmosphere) and how they are connected.

This activity is the introductory experience to a series of lessons about water resources on Earth. Students can investigate the previously mentioned Earth systems by making observations in nature and identifying the systems in the natural world.

Ultimately, the students will understand how the four spheres/systems are interconnected.

Australian Curriculum v9 Codes: AC9S9U03 (Year 8)
