Why do astronauts float?

Posted by [sat](#) on Sat, 2014-07-26 20:08

This video explains the concept of free fall.

The resource is a video in which *Catalyst's* Dr Derek Muller reveals why objects are apparently weightless in space.

The video first explores some of the common misconceptions people have about gravity and the scale of distances in space for objects in near-Earth orbit before explaining the concept of freefall, which gives rise to the apparent weightlessness of astronauts in space.

Australian Curriculum v9 Codes: AC9S7U04 (Year 7)
