## Old Bernie's Pond

Posted by [sat](#) on Thu, 2014-08-28 22:19

This interactive simulation introduces the concepts of habitat management.

The resource is a Scootle interactive that teaches students how people's actions can have positive and negative impacts on the health of a water environment.

Students learn about the effects of pollution and introduced species, and take positive action to restore the health of a pond by planting native species and removing sources of pollution.

New Australian Curriculum 9 Codes: AC9S6U01 (Year 6)
