Invertebrate Key

Posted by [sat](#) on Wed, 2014-09-03 21:21

This interactive dichotomous key looks at the classification of invertebrates.

The resource is from CSIRO entomology. It is simple to use and enables users to work towards the identification of insects according to their observable features.

Once a particular invertebrate has been chosen, it includes information about their life characteristics, feeding, habitat, and life cycle.

The site also provides links to information about studying invertebrates as well as collecting and preserving them.

This resource would be best used in conjunction with a unit on biodiversity and/or insects and is a companion to the Queensland Museum's Backyard Explorer resources.

New Australian Curriculum 9 Codes: AC9S1U01 (Year 1), AC9S3U01 (Year 3), AC9S5U01 (Year 5), AC9S7U01 (Year 7)
