AIS: Footwear in a school science laboratory

Posted by [sat](#) on Sun, 2014-11-30 21:36

This downloadable document provides information regarding appropriate footwear in the school science laboratory.

It is important that schools have a set of 'laboratory rules' established for the school science department that apply to all people entering the science laboratory including: students, teachers and technicians.

These rules should include required Personal Protective Equipment (PPE) that includes appropriate footwear.
