Conductivity - Conductors and Insulators

Posted by [sat](#) on Sun, 2015-01-18 17:06

This online resource show how to make a simple conductivity tester.

The resource has teacher background notes, worksheets and step-by-step instructions on how to make a simple conductivity tester using a battery and light bulb.

This activity is designed to teach the difference between electrical conductors and insulators.

Australian Curriculum v9 Codes: AC9S6U03 (Year 6)
