Rock Cycle Interactive

Posted by [sat](#) on Thu, 2015-02-26 21:15

This interactive simulation looks at the Earth's rock cycle.

The resource looks at evolution of rock types with an emphasis on students learning to identifying the different types of rock that occur as part of the cycle.

This interactive provides valuable visualisations that allow students to explore highly abstract concepts and apply their understanding to natural features of the landscape.

Australian Curriculum v9 Codes: AC9S8U04 (Year 8)
