Push-Pull - Primary Connections

Posted by [sat](#) on Thu, 2015-05-28 18:55

This unit of work introduces younger students to the concept of forces.

The resource details ways of engaging younger students when learning about forces by investigating moving toys, floating and sinking, air and flight.

It provides advice and details activities designed to involve students in investigating how a push or a pull moves an object.

It includes 8 lesson plans, student worksheets and other resources that will support its implementation.

New Australian Curriculum Codes: AC9S1U03 (Year 1)
