Learn Chemistry - Problem Based Practical Activities

Posted by [sat](#) on Thu, 2015-06-11 10:29

This online resource details 10 chemistry practical-related activities for later-year students.

Aimed at students aged 16–18 yrs, the activities are designed to develop their practical and independent study skills.

The activities are problem-based where the students must work in groups to apply their understanding of a concept as well as devise a solution to a practical problem set in a real-life context.
