Practical science for younger learners

Posted by [sat](#) on Sat, 2016-03-05 00:28

This online resource demonstrates various learning programs for teaching the practical aspects of chemistry to younger students.

The web page contains a video showing a teacher and his class investigating the mixing of liquids and concentrates using the 5E learning program from Primary Connections.

The video is designed to demonstrate practices that exemplify teaching standards considered appropriate for a proficient teacher. It is accompanied with detailed information on: standards, discussion questions, the Australian Curriculum, school contexts, learning contexts, accessibility and copyright information.
