Hydrochloric acid and ammonia reaction

Posted by Anonymous on Fri, 2016-08-26 08:53

Hydrochloric acid and ammonia reaction: Hi, could you please advise me about a demo of HCl and NH₄OH fumes mixing? Is it safe enough to put 30 ml (or less?) of each into separate petri dishes in the fume hood? Can the fume hood be turned off for 10 seconds for better visibility of the NH₄Cl and then turned back on again?
