## SOP: Performing a lung dissection

Posted by [sat](#) on Thu, 2016-09-08 17:06

Standard Operating Procedure (SOP) and detailed method including photographs for how to perform a lung dissection. The accompanying example risk assessment should be used as a guide only, and users should consider risks and safety measures in their local environment before proceeding.

The external link below to the STEM Learning website is a very good instructional video for teachers/demonstrators.
