Radioactive sources

Posted by Anonymous on Fri, 2018-05-11 18:21

What are the requirements to keep radioactive sources?

Do we need to have them registered? And if so can you please point me in the right direction ie a website/forms.....

Have you seen our [SOP: Handling sealed radioactive sources?](#)

This contains the relevant information and is based upon the <https://www.arpansa.gov.au/regulation-and-licensing/regulatory-publications/radiation-protection-series/guides-and-recommendations/rps18> We recommend downloading and printing this guide from ARPANSA.

The need for registration depends upon what sources you have, and the requirements set by the radiation regulatory authority in your state/territory. Links can be found on the ARPANSA website: <https://www.arpansa.gov.au/regulation-and-licensing/regulation/state-territory-regulators>

Follow the link for the regulator in your state/territory and follow the information on their website or contact them directly if you need further information.
