Big Bang videos and worksheets

Posted by miss.alicia.brown on Sat, 2014-03-15 14:54

Includes full lesson plans for topic, support notes, worksheet and links to videos on YouTube.

The introduction to this lesson asks students to mind map their thoughts around existing theories of how the universe was created. The teacher can then facilitate discussion around the Big Bang Theory, followed up with two short captioned videos projected while students complete the accompanying worksheets.

An interactive timeline may also be projected onto a whiteboard to demonstrate the theory.
