## Newton's inertia beads

Posted by [sat](#) on Sun, 2014-03-16 14:28

This online resource shows the steps taken for a teacher demonstration that focuses on the concepts of inertia, energy and motion in general.

In this demonstration, a long string of beads is given a slight tug and practically pulls itself out of a container and onto the floor.

The web page includes an explanation of how it works and how to take the demonstration further.
