Newton's inertia beads

Posted by [sat](#) on Sun, 2014-03-16 14:28

This online resource focuses on the concepts of inertia, energy and motion in general.

The resource gives instructions for a teacher demonstration where a long string of beads is given a slight tug and practically pulls itself out of a container and onto the floor.

The web page includes an explanation of how it works and how to take the demonstration further.

Australian Curriculum v9 Codes: AC9S10U05 (Year 10)
