Exploring atoms - atom structure

Posted by [sat](#) on Mon, 2014-04-07 09:43

This online resource explores the development of the atomic model.

The resource is a Scootle website that gives students the opportunity to examine how evidence was collated to eventually suggest the current model of the atom. Students could use this to draw a timeline for the development of atomic models to show how scientific theories result from an accumulation of knowledge.

Australian Curriculum v9 Codes: AC9S9U06 (Year 9)
