Types of matter - using the particle model assessment

Posted by [sat](#) on Mon, 2014-04-07 09:59

This online resource tests a student's knowledge about the states of matter.

The resource is a Scootle assessment item that tests student's ability to identify characteristics of solids, liquids and gases using the particle model.

This assessment is useful in quickly identifying the students who have grasped the concept. It can be used as a pre-test to determine prior knowledge and then post-test to show improvement.

Australian Curriculum v9 Codes: AC9S7U05 (Year 7), AC9S8U06 (Year 8)
