What is inheritance?

Posted by [sat](#) on Tue, 2014-04-08 01:09

This online resource explains terms associated with genetic inheritance.

The terms covered by this resource include: inheritance, phenotype, genotype, dominant, recessive, gametes, and alleles. They also detail the process of sex determination.

The information is concise and is a good introduction or revision for students.

The students can also do a quiz at the end to test their understanding.

Australian Curriculum v9 Codes: AC9S10U01 (Year 10)
