Activities for elementary and middle school plate tectonics

Posted by [hsilvest](#) on Tue, 2014-04-08 17:22

This resource is to a Youtube video about plate tectonics. The presenter shows 5 ways to model the layers of the earth, how tectonic plates move across the Earth's surface, and the types of boundaries that exist between the plates. There are a number of small demonstrations which cover all aspects of the above and teachers can handpick the activities which best suit their class and integrate these into their course.
