Rock Cycle Modelled out of Crayons

Posted by [sat](#) on Tue, 2014-04-08 17:28

This online resource demonstrates how to simulate the rock cycle.

The resource is a step-by-step YouTube video guide for using wax crayons to demonstrate erosion and creation of sedimentary rocks as well as the link between sedimentary and metamorphic rock.

A worksheet is also available for students to use when replicating this task in class.

Australian Curriculum v9 Codes: AC9S8U04 (Year 8)
