Light shows - Primary Connections

Posted by [Anonymous](#) on Sat, 2014-04-26 12:40

This online resource helps teach younger students about light.

The resource is a unit of work where students learn how the reflection, absorption and refraction of light enables them to see.

It includes eight structured lessons, guiding students through an integrated sequence based on the 5Es learning model.

It also includes comprehensive lesson plans, activities, student handouts and additional teaching support material.

Australian Curriculum v9 Codes: AC9S5U03 (Year 5)
