Shaping the Earth's surface - ScienceWeb

Posted by [sat](#) on Sat, 2014-04-26 19:06

This online resource looks at the processes that change the Earth's surface over time.

The resource created by ASTA is a 5-lesson unit of work that teaches students about the geological processes and other phenomena that can affect the Earth and how they can change the Earth's surface over time.

It includes links to digital resources and worksheets as well as the details of investigation into how water affects landscapes.
