Survival - ScienceWeb

Posted by [marianne.nicholas375](#) on Sat, 2014-04-26 20:58

This online resource is a 5-lesson unit of work teaching students about the adaptations of plants and animals in desert and semi-arid regions.

The unit includes discussions, individual work, group tasks, and an investigation to develop an understanding of behavioural and structural adaptations that enable plants and animals to survive. Students design and conduct their own investigation using an investigation planner.
