Need to find where to purchase equipment and consumables for school science laboratory fit outs, practical resourcing and safety equipment? This Science ASSIST resource is a spreadsheet of school science suppliers and businesses which provide laboratory equipment, resources, supplies and other merchandise suitable for use in Australian school science laboratories.

It is recommended that you use the online version of the spreadsheet rather than download a copy so that you are always accessing the latest information. The date of the latest update is in the title.

Note: This list is scheduled for an update during 2023.
