This online resource details a student activity involving natural selection.

The resource is an academic paper that details how two sets of playing cards and some easily made props can be used to demonstrate how inheritance and natural selection through environmental changes can affect the evolution of a species.

The paper gives details of the hands-on activity the students use as well as showing examples of the statistics that can be used to demonstrate the effect.

The paper also acts as limited background notes for the topic.

Australian Curriculum v9 Codes: AC9S10U02 (Year 10)
